

LT-1 Hydraulic Lift Tables

The American table is designed for use in loading crematories, funeral coaches, vans or coolers. It offers ease of use, maneuverability, and durability. There are no pedals or pumps to operate. A narrow frame and large casters permit its use in tight spaces. The platform has five rollers and a locking mechanism to keep the load stationary.

The heavy duty 12 volt battery will operate the lift table continuously for many hours without charging.

AMA0008 Battery Powered Hydraulic Lift

AMA0009 Battery Powered Hydraulic Lift - with Scale

Specifications

Length	73"
Width	30"
Max Height	w/scale 72"
Height Lowered	w/scale 24"
Max Height	without scale 71"
Height Lowered	without scale 22"
Weight Capacity	400-500 lbs.
Upgrade Option	Built-in weight monitoring system

Multi-Directional Lift Table Top

Allows the operator to load and unload an inside cooler with ease, work in tight spaces, and load the cremation equipment from any angle.

HD-2 Heavy Duty Hydraulic Lift Table

The HD-2 is designed to provide you with the ability to lift, load and store heavy caskets and cases with ease. The HD-2 is constructed with HD 1020 carbon steel for strength and durability. The automatic push button remote can be removed or holstered for operation. The HD-2 is designed to lift and load up to 1200 lbs. The HD-2 also has the option of an onboard scale system so you know exactly what the load weight is.

AMA0010 Heavy Duty Battery Powered Hydraulic Lift

AMA0011 Heavy Duty Battery Powered Hydraulic Lift - with Scale

Specifications

Length	73"
Width	30"
Max Height	w/scale 80"
Height Lowered	w/scale 22"
Max Height	without scale 80"
Height Lowered	without scale 21"
Weight Capacity	1,000 lbs. +
Upgrade Option	Built-in weight monitoring system
